## ELEMENTS

### Metallic Glass Cylinder Gravity-Fit Shade

Simple yet elegant ELEMENTS metallic glass cylinder pendant shades combine contemporary cylinder shapes with translucent metallic glass to add visual interest to any décor. These shades enhance the ambiance created by filament lamps by revealing and multiplying the soft glow of the filaments. When used with ConTech's CRS8 LED Pendant choose the double cylinder configuration with white frost inner cylinder to illuminate the outer shade evenly for a clean, inviting design. These shades are designed for use with ConTech's Gravity-Fit pendant fixtures and include 1-11/64" (30 mm) I.D. mounting ring.
